

- Keep diseases away – **biosecurity**
- Set and Maintain **pig flow**
- Enhance the health of the pigs

Reduce the stressors on the pig

- **Biosecurity**
- **Pig Flow**
- **Medicine**
- **Water**
- **Air**
- **Feed**
- **Floor**
- **Stock**
- **Stockmanship**

Examine the water system

Drinkers – Check for variability

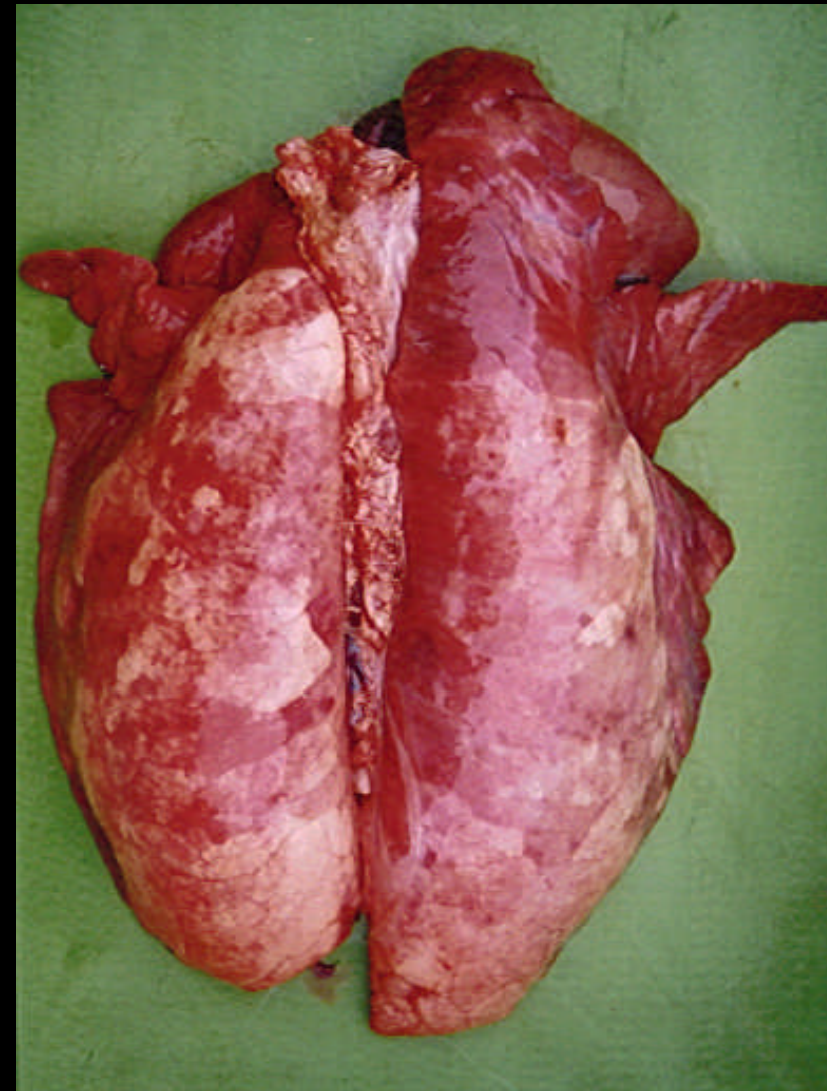

Check flow

Blocked drinker

Reduced down pipe diameter

Damaged supplies

Leaking drinker

Misplaced drinkers

Check positioning

Too many pigs

Inadequate depth

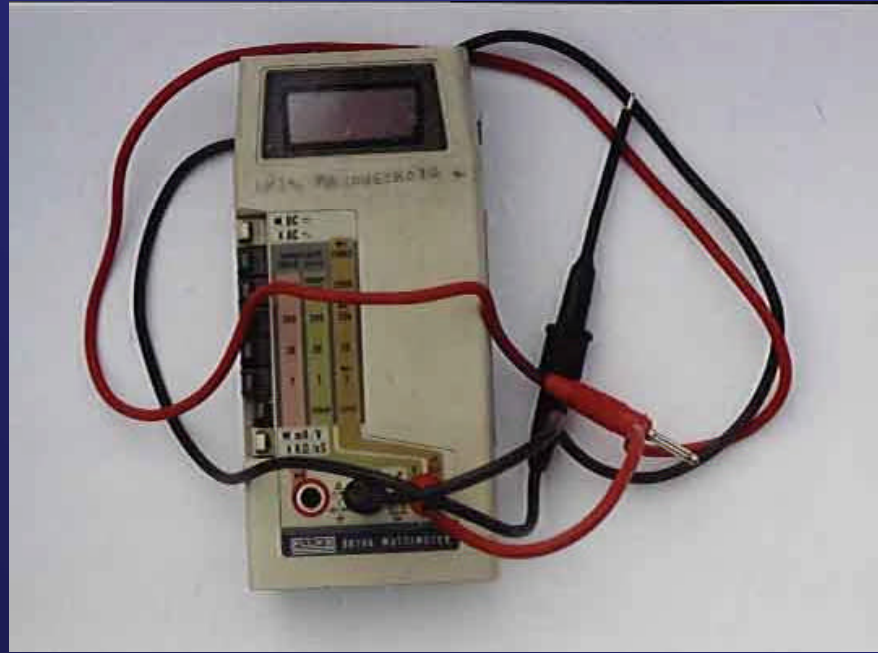

Feed issues

Quality Contamination

Stray voltage

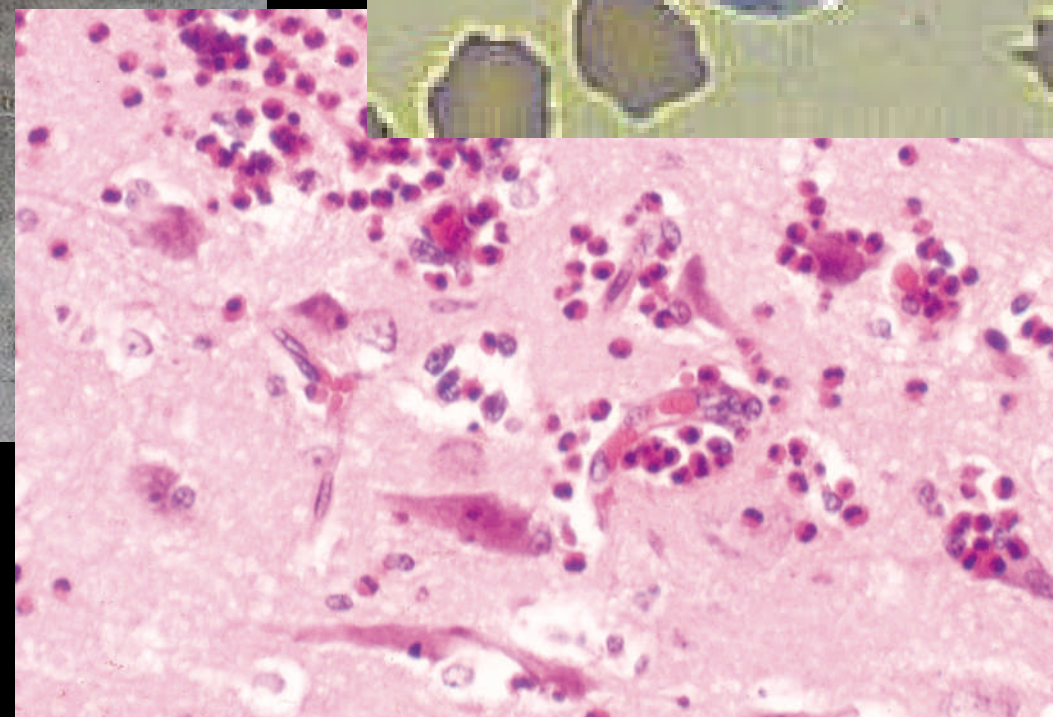

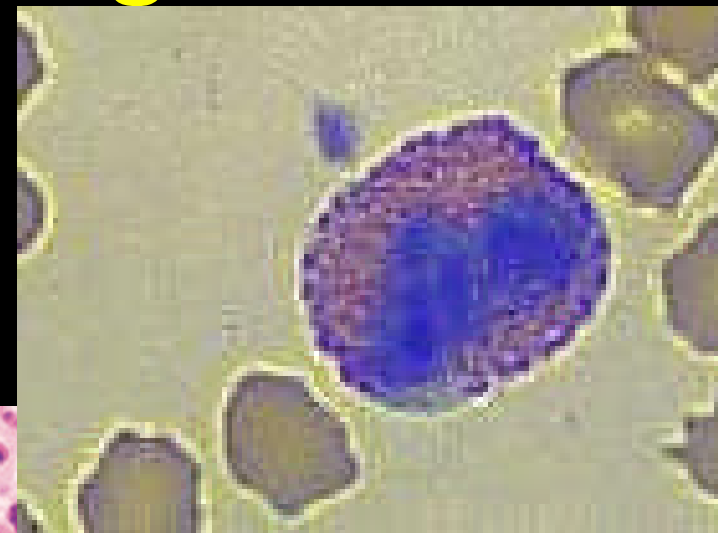

Position of drinker

Water for cooling

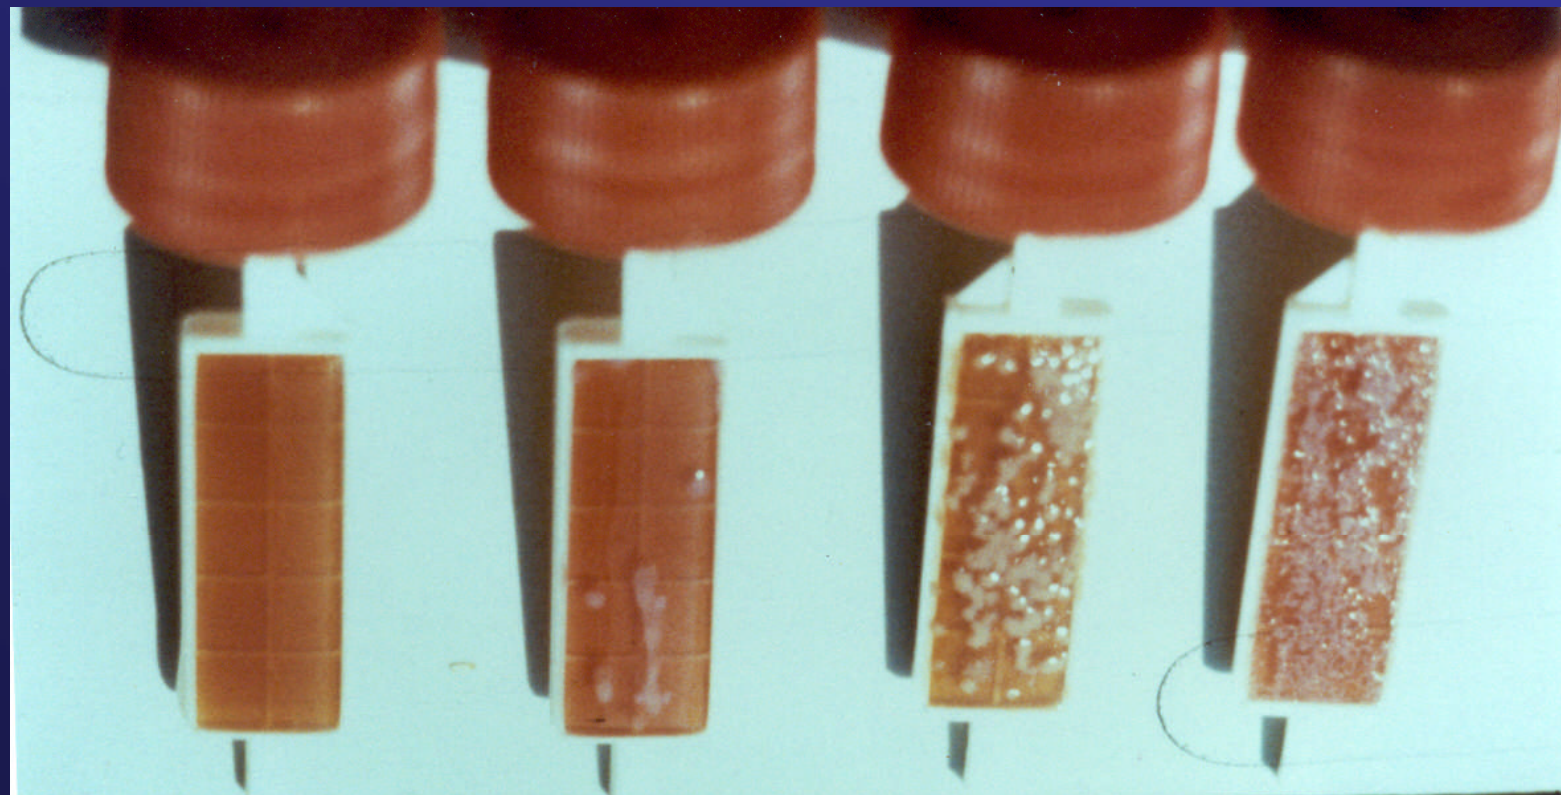

‘salt poisoning’

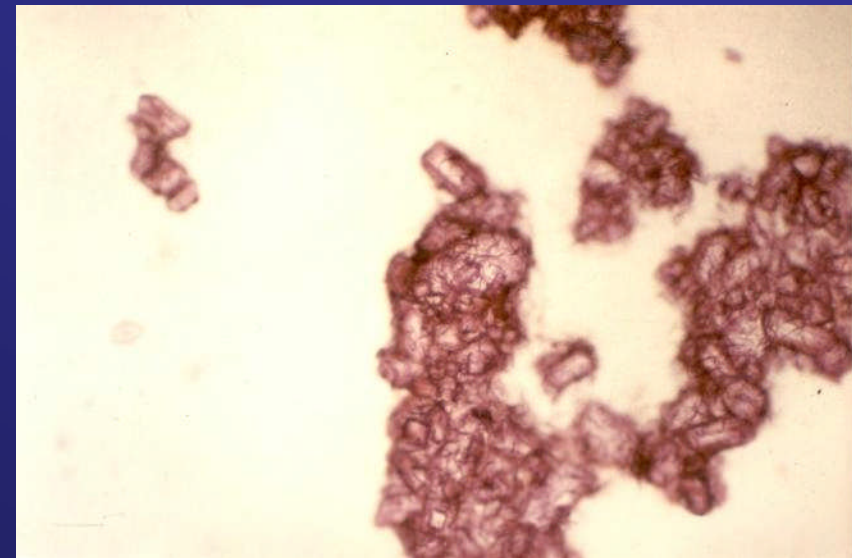

Urinary Tract Problems

- Bacteriuria
- Crystaluria
- Cystitis
- Pyelonephritis

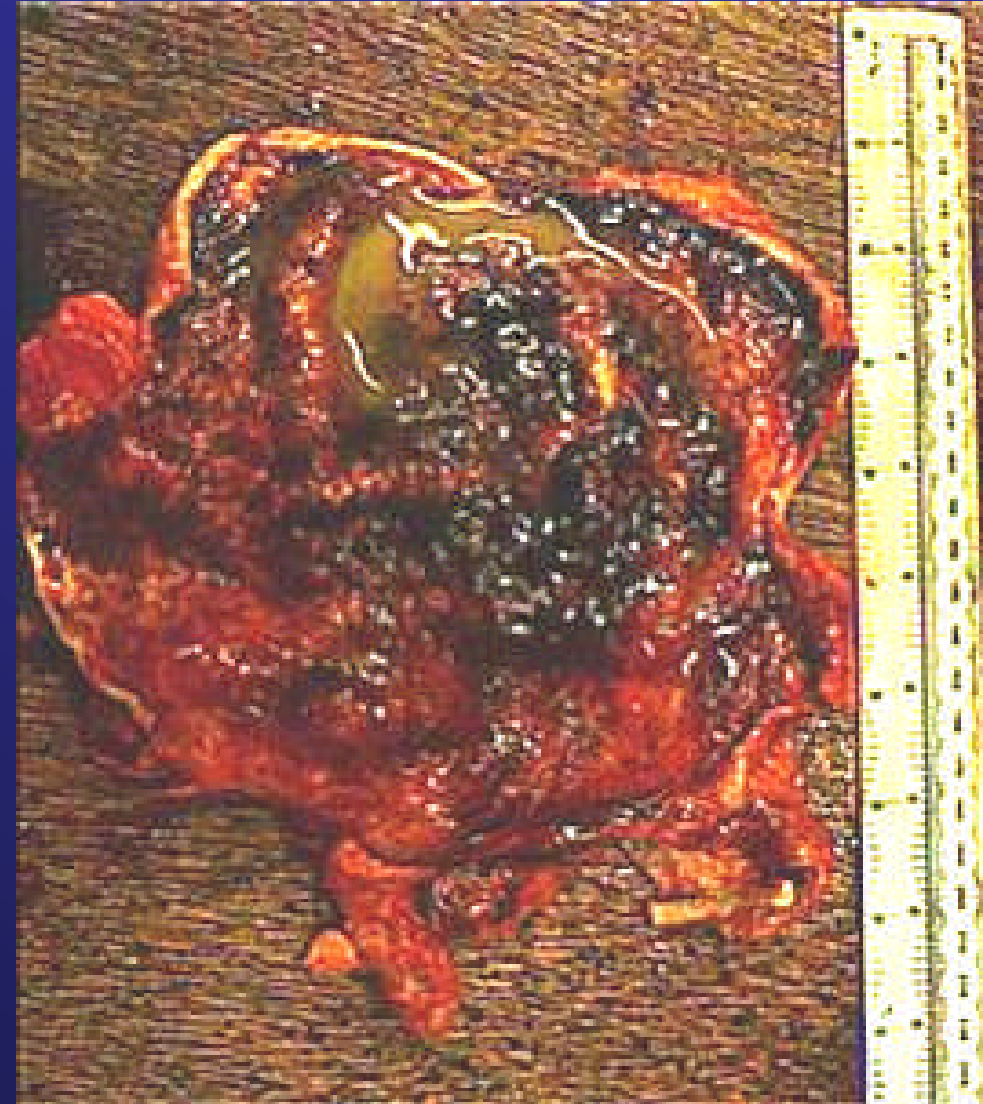

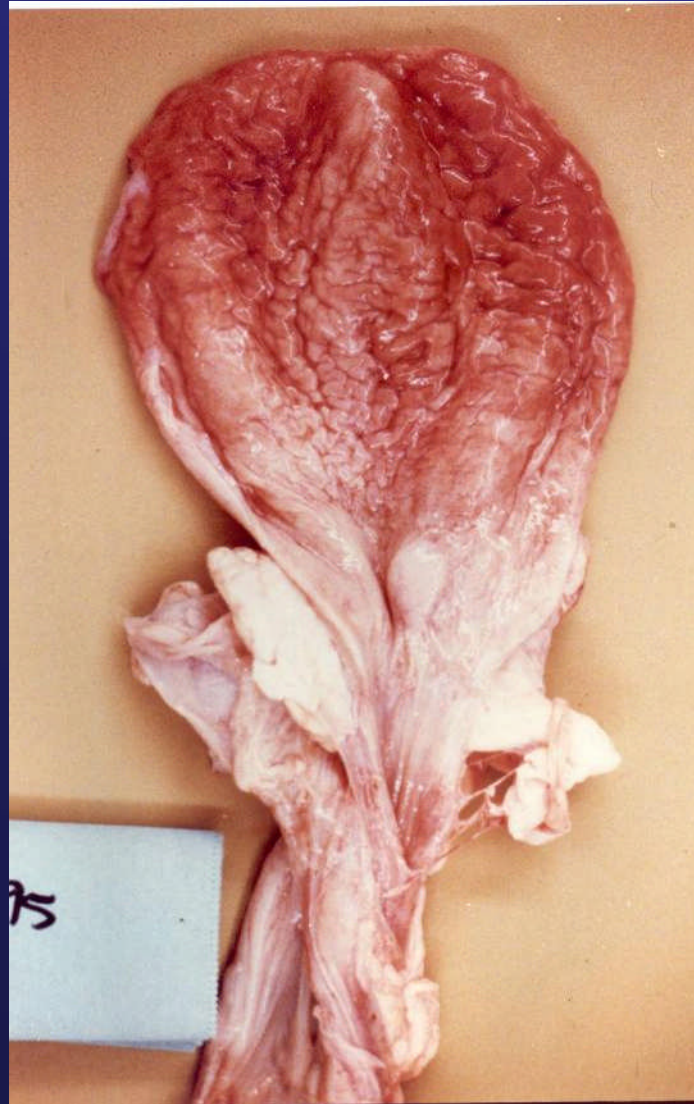

Bacteriuria

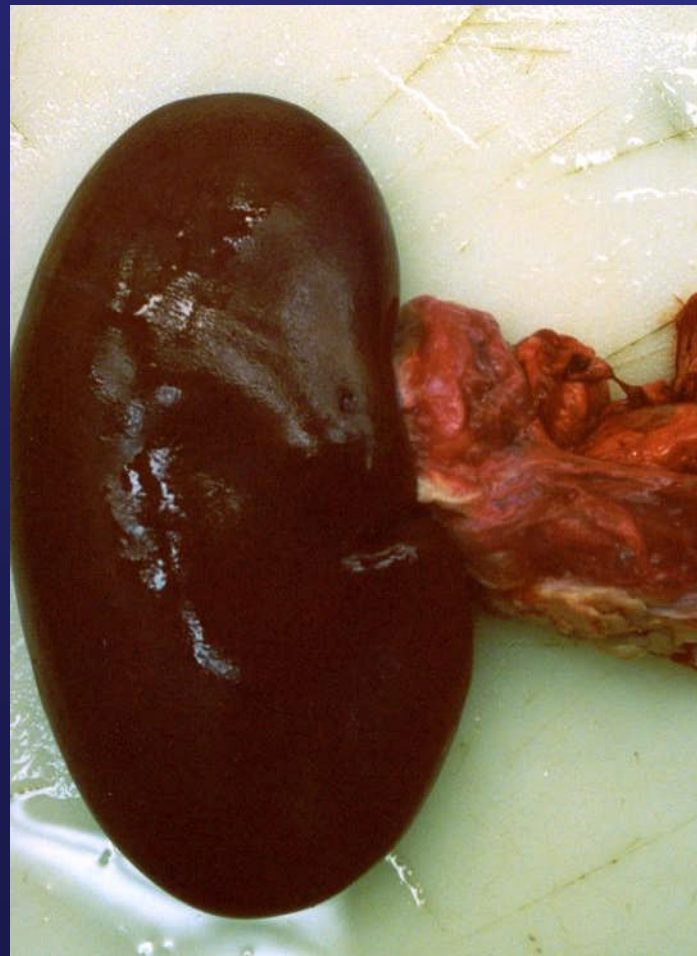

Crystaluria

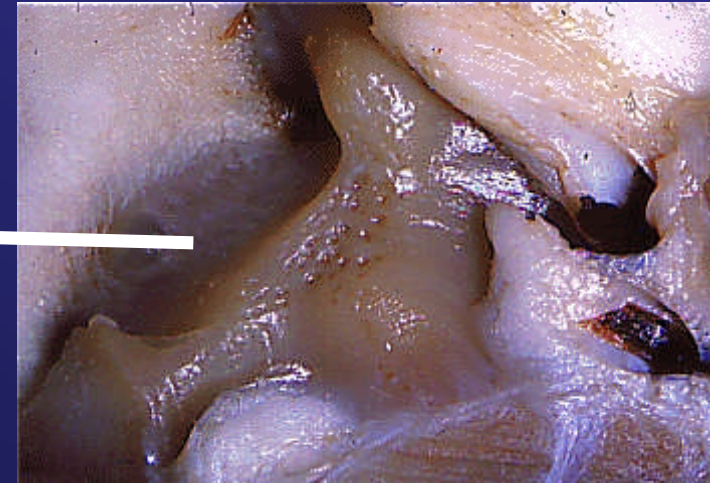

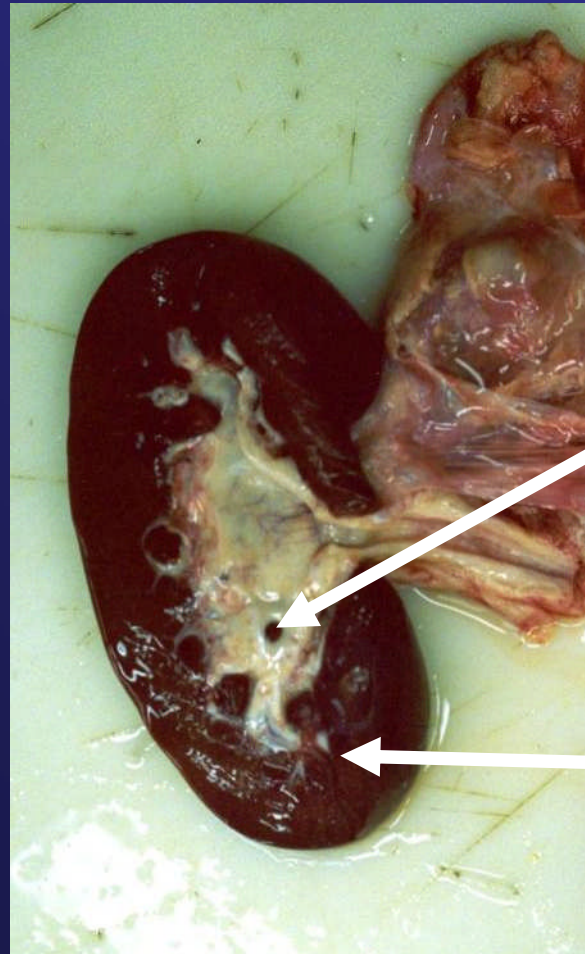

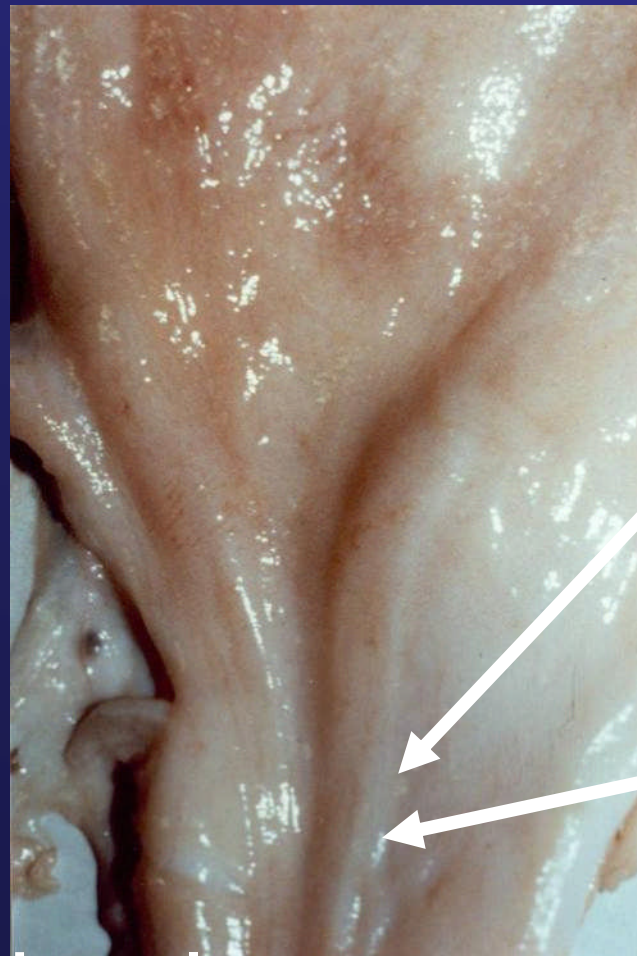

Cystitis

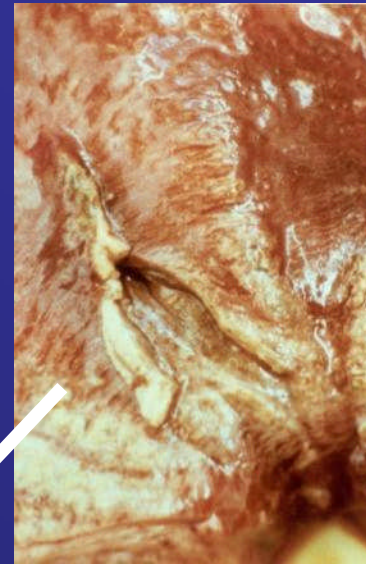

Pyelonephritis

Normal

Acute

Chronic

Other diseases

- Gastric ulceration
- Chronic respiratory disease
- Greasy pig disease
- Vulva biting and other vices

What I would do for a drink
